100% to size

The
Institute
of Medicine
recommends that a healthy person
in a temperate climate should drink
roughly 2.2 - 3.0 liters of water
every day.

That is about 6 of these
bottles every day!

The EMRE Fairfax Safety Committee

The graphic features a red square background with white text and several white circles of varying sizes scattered around the text. The circles are arranged in a way that suggests they represent water bottles. The text is centered within the square.
